

Gothic Unicode Sample

The Gothic Language Kit for OS X can be used to create just about any type of text that uses the Gothic script.

This page is encoded as Unicode (utf-8) and requires a compatible browser like Opera (or Safari under OS X 10.3) and a properly encoded Gothic font. If you don't own the Gothic Language Kit for OS X and don't use a Macintosh, you can view a [PDF version of this file](#).
